

RESOLUTION

TUESDAY 25 FEBRUARY 2025

Resolution

This meeting of SVP members, having heard the updated report on enterprise agreement negotiations:

- Acknowledges the positive progress in gaining modest additional resources which will be incorporated into the agreement as well as an on-going consultative mechanism that will review staffing and allocate tranche 2 shifts; and
- Expresses our disappointment that key staffing and workload management issues have not been resolved and that these fundamental issues remain a work in progress; and
- Acknowledges that further bargaining and PIA would not fundamentally change the offer; and
- Understands that the EBA will be renegotiated in early 2027 and these staffing issues will be front and centre of those negotiations along with parity with the public sector.

We resolve as follows:

1. To support the recommendation of the ANMF and our job reps that, subject to agreement on drafting, the agreement now go to a ballot of all staff.
2. To ensure that all members are informed about the positive elements of the proposed agreement.
3. To suspend all industrial action (whether Stage 1 or Stage 2) from the point that officials and job reps are satisfied with the drafting.
4. To thank all members for their commitment and support during the campaign.
5. To express our gratitude to our job reps for the enormous amount of work they have done over the course of this campaign.
